Dear Landon:

Welcome to Remington Country!

Thank you for your inquiry. We have a Safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products.

The Model 788 is not included in the Safety Modification Program.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

Thank you for your inquiry.

Customer (Landon Pierce)

Hi, my name is Landon Pierce. My father owns a model 788 that he bought in the mid-late 70's. I do not know the serial number because it is at my grandparent's house, 180 miles from us. I was wondering if you could tell me how to determine if it has a bolt locking mechanism (in regards to the safety concern). thank you
