Dear Mr. Gossett,
Thank you for your inquiry. We have a Safety Modification Program on certain model bolt action rifles including the Model 600. All Remington Model 600 and 660 rifles were manufactured with a bolt-lock mechanism and are subject to this bolt-lock Safety Modification Program. These models were discontinued in 1979. Please see Important Safety Notice regarding the 1979 recall through the link below.

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

I have read on the internet that the Model 600 is prone to accidental discharge when the weapon is being taken "off safety."

I was given a used Model 600 in the late 1970's and haven't had such event occur; however, I am concerned.
