Dear Mr. Pokonosky,
Thank you for your inquiry. You can find complete directions regarding the Safety Modification Program and instructions for sending your firearm to a Remington Authorized Repair Center or our factory through the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

I understand that you are willing to modify the bolt lock on my 700 magnum because of a potential discharging problem.

I will need to know where and how to send this firearm to you. I understand there is a 20.00 fee which I will enclose...Tom Pokonosky
