Dear Mr. Gorsett: This is not a recall, but a safety modification program.

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

Please visit our website at the above address for clarification of the safety issue. The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety."

<http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you need a replacement copy of your Remington owners manual, or safety booklet, you can download or request a copy from the support section of our web-site.

Owners manuals - <http://www.remington.com/whatsnew/readroom.htm>

Safety Booklet - <http://www.remington.com/pdfs/sftybklt.pdf>

You may also obtain a copy by calling toll free 1-800-243-9700, and pressing option 1.

I believe that I saw a recall regarding the safeties on these two rifles. Something about modifying them to be able to open the action with the safety on. If this is the case please let me know. Thanks for your help and your excellent firarms, RLG.
