Dear Mr. Sciegienny,

Thank you for your inquiry. According to the information provided, this firearm was manufactured in or around 1984. To determine whether your Model 700 or 40-X rifle has a bolt-lock mechanism, either:

Call Remington toll-free at (877)387-6691 and a service representative will help you determine if your firearm has a bolt-lock mechanism, or

Take your Model 700 or 40-X rifle to a Remington Authorized Repair Center and a qualified gunsmith will examine your firearm and determine whether it has a bolt-lock mechanism.

I am an original owner of Remington Model 700 BDL, # B6587217, bought in 1984.

When the rifle was manufactured ?

Does it have a Bolt-Lock ?

If it has a Bolt-Lock is it necessary to remove it ?

I found your safety message in the latest issue of Outdoor Life and on the WEB site.
