Dear Jason,

If you have any concerns regarding the safe operation/condition of your firearm, we strongly recommend that you take it to a Remington Authorized Repair or send it to our factory for evaluation.

We are currently offering a Safety Modification on older Model 700 rifles.

If you have a Model 700 rifle, you can find more information regarding this program through the front page of our website at [www.remington.com](http://www.remington.com).

I have recently heard a rumor about the Model 700 firing when you click the safety off, I was wondering if this was true?
