Dear Mr. King,

Thank you for your inquiry. We are offering a Safety Modification on certain bolt action rifles including older model 700 rifles. You can find more information regarding this program through the front page of our website. To determine whether your Model 700 rifle has a bolt-lock mechanism, either:

Call Remington toll-free at (877)387-6691 and a service representative will help you determine if your firearm has a bolt-lock mechanism, or

Take your Model 700 to a Remington Authorized Repair Center and a qualified gunsmith will examine your firearm and determine whether it has a bolt-lock mechanism.

This rifle was manufactured before 1982. I read an article in Hunting magazine which described a safety modification. Does this rifle meet the criteria?

Art King
