Dear Mr. Cork,

Thank you for your inquiry. According to the information provided, this firearm was manufactured in or around 1978. We have a Safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products. If you have a bolt lock safety, we strongly recommend that you take advantage of this offer.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

I am no sure of the year model of my rifle. However, I have run into several notices related to a safety modification program for certain boltaction centerfire firearms manufactured prior to 1982.

The instructions were given to call 877-387-6691 to learn about the 1979 safety recall. I have tried this number numerous times and have not received any response.

Please help me. I need to know if my rifle falls in the acceptable range for this program. If so, Tell me what I need to do.

Thank you for your help.
Ferrell O. Cork, Jr.
