Dear Mr. Elliott,  
Thank you for your inquiry. You can contact our Consumer Service Department at 1-800-243-9700 M-F 9-5 EST regarding the safety modification program.

In regards to your question about the number of 280's made in the Model 740, our company historian is currently out of the office. If you will call the above number at the end of August, they should be back to answer your inquiry.

I looked up the phone number for my brother for the safety problem. He called it and got someone in Canada. They have had other calls on this.

What is the 1-800 number please.

Also, I have a 740 in the 30-06. It is the most common. I also have a near mint 740 in the .280. I know the number of total 740s made and when, but can you tell me how many .280 rifles were made in the 740.

Thanks, Don Elliott.
