Dear Mr. Faina,

Thank you for your inquiry. According to the information provided, this firearm was manufactured in or around 1953. These firearms were manufactured in our factory in Ilion, NY.

We also wanted to make you aware of a safety modification program that we are having on these and other bolt action rifles. You can read all of the details regarding this program through the front page of our website at www.remington.com.

This rifle is chambered for the 30-06spngfd. It shoots fatory load groups so tight people have asked me about my "hand loads". I tell them, These are factory loads buddy!" The original stock cracked and the owner hand made a beautiful replacement styled after your Model 30 complete with the forearm tear drop. My questions;

a) What year was this rifle made?

b) Why do pre '64 Winchester 70's have barells identicle to the 721's?

Did the both of you buy from the same barell companies and if so was the factory/company in Belgium?.....royce
