Thank you for your inquiry. We have a Safety Modification Program on  
certain model bolt action rifles. This is a voluntary program, it is not a  
recall. This is designed to remind people of the existence of the  
bolt-lock feature and to offer customers the opportunity to modernize  
their products. If you have a bolt lock safety, we strongly recommend  
that you take advantage of this offer.

You can read more information regarding our firearms and our Safety  
Modification program through the front page of our website or the link  
below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly  
and routine maintenance, as well as adherence to the "10 Commandments of  
Firearm Safety." <http://www.remington.com/support/10comm.htm> It is  
critical that you familiarize yourself with the information in both the  
owners manual and safety booklet. Whether you are a veteran shooter with a  
collection of Remington firearms, or a first time shooter, take the time  
to review this important literature and be certain that you are practicing  
firearm safety!

If you have any questions, please feel free to contact us at  
1-800-243-9700 or 1-877-387-6691.

Customer (Fredrick Layton Patten) 8/22/2002 10:17:05 PM  
Please explain what I need to do for the safety modification. Both of the  
above rifles were purchased around 1972. Neither has given me anything  
but great service. The 25-06 is the greatest shooting rifles on the  
market as is the 7 MM Mag. My 25-06 has downed a prohorn antelope at  
greater than 400 yards with 120 grain Remington extended range  
ammunition. My son shot his first antelope with the 7MM Mag using a 120  
grain bullet too, he has also caught king salmon in Alaska.
