Dear Scott,

According to the information provided, this firearm was manufactured in or around 1972. It is very likely that the previous owner removed the sites from the barrel. You can tell this by the holes in the top of the barrel.

We also want to make you aware of a Safety Modification Program that we are offering on these firearms. You can find all the details regarding this program through the front page of our website or through the link below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

Hi

I recently purchased a used Remington Model 700 BDL .25-06 serial number 6491419. Can you tell me how old the rifle is?

From reading your website, it appears that all model 700 BDL rifles were sold with sites. This one has no sites. Does it mean the previous owner removed them and is it common to remove them if you are going to add a scope?

Regards and Thanks

Scott
