Dear Verne,

We truly regret the problems you've experienced with getting your new gun. Due to production constraints the SAUM was pushed back on the production schedule. They should be coming out sometime in the fourth quarter. You may take your Model 600 to the repair centers below for the Safety Modification update. We hope this information is helpful and we appreciate your loyal support of Remington products.

dear remington,back in feb. of this year i ordered a new model 7 300s.a. ultra mag which i had seen in hunting magazines since november of 2001.the dealer called the dist. and was told i had to put a deposit down to get on a list.so i did the deposit and have been waiting.8 months later no gun so sept. 1 i e.mailed remington and they said they were coming the first week of sept.still no gun and deer season starts here in 4 weeks so last nite i called the dealer and told him to cancel the gun and keep the deposit.Ive hunted with remingtons all my life and own a vault full of them .i dont want a browning and the dealer down the street has a pile of them in winchester short mag.iLL keep hunting with my model 600 350 mag. that ive had for 30 years and i see you have a recall on to fix the saftey.i wouldnt send it to you because i wouldnt get it back for several years.im really disappointed with remington arms and will probaly never buy another.im a avid shooter and breath deer hunting and hope you people wake up and dont start advertizing a gun for a year and not make them...see ya vern green
