Thank you for contacting Remington Country. The information that you requested is as follows:

Carrier Assembly-Lifts the shell from the magazine to the bolt which then feed it into the chamber.

Receiver Assembly-Holds the multiple assemblies in a way allowing each to work together.

Sear Pin-Allows the sear to rotate freely.

Sear-Holds the hammer in the unfired position until the trigger releases the hammer.

Slide Assembly-Connects the bolt assembly to the action bars and activates the locking bolt.

If we may be of further assistance please feel free to let us know.

Thanks-
Melissa
