Dear Mr. Niven,

Thank you for your inquiry. Instructions are provided on our website for sending the firearm to our factory or Remington Authorized Repair Center to participate in the Safety Modification Program.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

<http://www.remington.com/repairsvc/ModelSelection.asp>

We would have no way of knowing if this will affect the value of the firearm. That would be determined by the used firearm market and what other dealers and consumers are looking for.

Customer (Charles Niven)

i seen on your website a safety program for the model 722 to have the lock tacked off the bolt so that the safety does not have to be taken off to unload the gun how do i go about doing this so that i can have this update done

Will this update affect the value of the gun it self
