Welcome to Remington Country and thank you for your inquiry.

The 700P sear and trigger engagement are polished. The 700P stock is produced by McMillan and the 700 VS stock is produced by HS Precision. Both of these stocks have aluminum bedding blocks that bed the action and free-float the barrels. The 700P HS Precision stock has a wider fore arm and has two swivel studs on the front.

The 700P does carry the same markings as all Remington firearms. They do have "Remington Arms Company, Inc. Ilion NY can caliber" stamped into the barrel.

We hope you find this information useful and if we can be of any further assistance please call us at 1-800-243-9700 Mon.-Fri. 9am-5pm EST.

Thank you for visiting Remington Country and have a nice day.

What are the differences in the 700 VS and the 700 Police.I know the Stock is different,what about the finish on each one.I also heard that the 700P had no markings on the barrel such as "Remington Arms Company Inc. Ilion NY .308 WIN" is this true.  
Thank you greatly
