Thank you for contacting Remington Country. Your Model 721 was produced in 1956. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. Any old/replaced parts will not be returned with the firearm. To view more details regarding this modification, go to:

[http://www.remington.com/Safety\\_Modification\\_Program/remington\\_safety.htm](http://www.remington.com/Safety_Modification_Program/remington_safety.htm)

To send the gun in for the recall do I need to send the bolt? If the trigger is worn to require replacement will I get the old parts back? Can I ship or do I have to use a dealer or gunsmith?
