Thank you for contacting Remington Country. Your Model 700 was produced in 1981. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

[http://www.remington.com/safety\\_Modification\\_Program/remington\\_safety.htm](http://www.remington.com/safety_Modification_Program/remington_safety.htm)

Anytime a firearm is purchased second-hand, we recommend taking it to a reputable gunsmith for cleaning and inspection to make sure it has not been altered to an unsafe condition. We suggest taking or sending your firearm to a Remington Authorized Repair Center or our factory for evaluation.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

I just bought this gun used from a person that bought it used also. He was told that it had a recall on it that never was fixed. I would like to know if this is a fact, and if it is can I still have the work done under the recall.

Thank you
