

Virus Alert Message - PLEASE READ

Discussion Thread

Response (Rena)
Dear Jeremiah,

Thank you for your recent inquiry. From the serial number that you provided, your firearm was manufactured in 1976. There is not a recall on the Model 700, it is actually a Safety Modification Program. I have attached the page from our website that explains in detail the Safety Modification Program.

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

I hope that you find this information helpful. Thank you for your continued support of Remington products and thank you for visiting Remington Country!

Customer

I received this message from Wendy - Pluffzoey - as I know many of you have.
I checked and the virus WAS in my system. Apparently 3 diff. folders. I especially apologize to those of you who receive this e mail more than once.
I had you in my address book under under different headings and you will receive an e-mail for each one even though it is necessary for you to follow these instructions only once for your computer system.

I received this message from Margaret (Shannytink) and this virus WAS on my system, I followed the instructions and deleted, please check your systems following her instructions and remember to delete it from your recycle bin (DO NOT OPEN THIS FILE JUST HIGHLIGHT AND DELETE) I apologize for any inconvenience this has caused.
Wendy

I received this from a friend and I had the virus. I apologize to all of you, and
> especially to those of you who should have been out of my address book, but
> were still there, and to those of you who I had in the address book in > multiple headings.
>
> Please read the below and follow the instructions.
> Unfortunately I have received this virus and it may have attached itself to
> some of my correspondence. I am not aware of any damage to my system but I
> have taken the following advice and deleted the file. Please take this
> seriously. A virus has been passed on to me by a contact. My address book
> WAS infected. Since you are in my address book, there is a good chance you
> will find it in your computer too. The virus (called jdbgmgr.exe) is not
> detected by Norton or McAfee antivirus systems. The virus sits quietly for
> 14 days before damaging the system. It is sent automatically by

messenger

- > and by the address book, whether or not you sent e-mail to your contacts.
- > Here's how to check for the virus and to get rid of it:
- >
- > YOU MUST DO THIS.
- >
- > 1. Go to start, Find or search option.
- > 2. In the file folder option, type the name jdbgmgr.exe
- > 3. Be sure you search your C:drive and all sub-folders and any other drives you may have.
- > 4. Click "find Now"
- > 5. The Virus has a Teddy Bear icon with the name jdbgmgr.exe DO NOT OPEN IT
- > 6. go to Edit (on the menu bar) and choose "select all" to highlight the file without opening it.
- > 7. Now go to File (on the Menu bar) and select delete. It will then to the Recycle Bin.
- > 8. IF YOU FIND THE VIRUS YOU MUST CONTACT ALL THE PEOPLE IN YOUR ADDRESS BOOK, SO THEY CAN ERADICATE IT IN THEIR OWN ADDRESS BOOKS.
- >
- > to do This:
- >
- > a. Open a new e-mail message
- > b. Click the icon of the address book next to the "to"
- > c. Highlight every name and add to "BCC (blind copy)"
- > d. copy this message and enter subject paste to e-mail
- >
- > SORRY FOR THE INCONVENIENCE

This email has been scanned for viruses by McAfee WebShield and is clean.
