Initial Tests, Measurements and Inspections:

VISUAL EXAMINATION, PACKAGING AUDIT AND PACKAGING TEST - TLW0300A THROUGH TLW0300C:

TLW0300A – Visual Examination

A visual examination will be made of all 30 sample rifles prior to the start of any additional testing, measurement or inspection. A temporary hang-tag will be attached to the trigger bow of each rifle with the numbers V1-V30 (“V” for “visual”) along with the serial number of each rifle. These temporary tags will be used to identify each sample rifle for the purpose of recording observations. After the visual examination permanent labels will be affixed to each test sample using the designations A1-A30.

Clearly defined visual standards are not established for this model at this time. Since no standards exist Marketing representatives will be present on site to conduct the visual examination. **Product and packaging as received from Mayfield will not be touched or opened prior to Marketing’s arrival.** No further T & P activity can start until Marketing has completed the visual audits of both the product and packaging.

TLW0300B – Packaging Audit

Marketing will also conduct the packaging audit while they are on site. Packaging will be audited as the firearms are unpacked. Each shipping box will be examined for:

- Match of Serial Number on Rifle to that on the box end label and owner’s manual package.
- Check the inventory of all required paperwork, owner’s manuals, videotapes, etc.
- Box examination for presence of tears in the cardboard, crushing, stains, box inserts, etc.
