Thank you for contacting Remington Country. Certain serial numbers in the Model 600 were recalled. We suggest taking or sending your firearm to a Remington Authorized Repair Center or our factory for evaluation.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

<http://www.remington.com/repairsvc/Modelselection.asp>

I have owned this rifle for many years and lately it has started firing when the safety is let off to unload it. (It has now happened 3 times in last 5 years.)

I have just discovered there is a recall on it. What do I have to do to get it fixed??
