Dear Mr. Nollenberger,

Thank you for contacting Remington Country. Following are the years of production on your Model 700's.

.223 Serial No. B6431336 - 1983
.257 Serial No. B6398272 - 1982
.270 Serial No. A6295638 - 1976
.270 Serial No. 6522613 - 1972

According to these serial numbers, your firearms have not been recalled. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

If you have had any problems with the firearm, we suggest taking or sending your firearm to a Remington Authorized Repair Center or our factory for evaluation.

You can locate your nearest repair center by visiting the Repair Information Center in our Support Section and selecting your model and state:

Customer (James Nollenberger) 5/26/2003 3:34:25 PM
I own four Remington 700's. A friend tells me there is a possibility of it going off when the safety is released. He said you have a program to check.

My guns are
.223 Serial No. B6431336
.257 Serial No. B6398272
.270 Serial No. A6295638
.270 Serial No. 6522613

Could you tell me if these guns are subject to firing if the safety is taken off?

Thanks!

Jim Nollenberger
