Dear Mr. Montfort,

Thank you for contacting Remington Country. Remington can convert your Model 700 to a non-bolt lock safety at our Remington Authorized Repair Centers. Please contact them for price and turn-around time.

<http://www.remington.com/repairsvc/modelselection.asp>

Your Model 700 was produced around 1980.

We appreciate your patronage and hope your Remington firearms will continue to service you and your family well.

I have a 22-250 of the Model and s/n above. I would like to have the rifle fitted with a safety that allows the bolt to be opened with the safety engaged. Does Remington do this retrofit and what is the cost and procedure. Also, can you tell me a date of manufacture on this rifle? I love Remington products and have started my daughter on the Remington 1100 .410 and the express 20 ga for Ducks. I shoot an 11-87 and have done it for years. I have owned three of them and the hardest thing is choosing which one to go out with in the morning. This 22-250 is going to be her starter rifle and when she's ready she is going to get a custom shop model 7 in .260 Remington.

Thanks,

J.D. Montfort
