model 700 mountain rifle

Discussion Thread

Response (Derek) 11/10/2003 3:54:42 PM Dear Paul,
Thank you for your inquiry. Remington discontinued production of the "bolt lock" style safety in 1985. The fact that you can open the bolt on your rifle while it is on safe, is perfectly normal.

I have purchased a 2nd hand, model 700 mountain rifle, in 257 rob improved. With safety on I can open the bolt. I wonder if this is normal as all my other rifles "not remingtons" I can not. I have this feature but am just checking to make sure it is normal and safe. Thank You

Paul

PS It is a lovely rifle and am keen to test it out on the local feral pigs
