Thank you for contacting Remington Country. Your Model 700 was produced in 1973. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

My hunting buddy told me there was a recall on this model. The recall involved the safety needing to be turned off before the bolt could be opened for unloading. I can see why this would be unsafe.

What are, if any, the specific steps required to have this gun repaired by the recall?
