Thank you for contacting Remington Country. Your Model 700 was produced in 1976. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I have a 30-06 SPRG Model 700 that I bought new in 1976. I have never had any problem with it. I was working with a co-worker the other day and he said he thought there was a recall on the safety or something for the Model 700. Is there any recall or work that should be done on my rifle?
