Thank you for your inquiry. According to the serial number of your rifle, it was made around 1979. We are not showing any type of call back on your rifle or any type of safety concern. We are offering a Safety Modification Program if you would like to have your safety updated so that the bolt will open when the safety is in the "Safe" position. This is optional for the consumer & there is a charge of \$20 to have your rifle updated. The following link will provide you with more information.
