Thank you for contacting Remington Country. Your Model 700 was produced in 1969. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I have a model 700 7mm that I was told had a recall on it. The serial number is 6284213. Could you please tell me if this is accurate. Also, I bought the gun used, could you tell me what year the rifle was made and what model 700 it is. I believe it is a BDL but I'm not sure. Thank you for your time.

Kyle
