Dear Martin:

Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 was produced in or around 1963. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today. We would suggest that you review the information found on our homepage in the Safety Center entitled "Bolt Action Safety Message: Safety Modification Program for certain pre-1982 rifles".

I have a Model 700 .243 rifle, and was wondering when it was manufactured.

It's serial number is 670xx. A friend told me it may be a pre-64 item. I have no idea, though I've owned it second hand since 1976 or so. I'd appreciate knowing this for sure, and figured you'd be the place to find out.

Thanks,  
Marty
