Dear Kurt:

Thank you for your inquiry. Your firearm was manufactured in 1971 at our firearms plant in Ilion New York. If you are unsure if your firearm has had the recall, please refer to the link below:

http://www.remington.com/Safety_Modification_Program/600_660.htm

The markings that you see are assemblers codes. The REP stands for Remington English Proof. There were approximately 1300 of the 222 calibers made. We hope that this information is helpful to you. If you have further questions feel free to let us know.

I recently bought a model 600 in .222. It has a vented rib. serial # 3070. The barrel has a Heart stamped in the barrel same side as bolt/right. Could you give me more details on this model. The gun is deadly accurate. I don't think the safety/recall has been performed. Just before the heart stamp is lettering RER? with circle around it. Curious if the barrel is factory or special addition? the barrel is 18.5" the gun is like brand new. Any info you could send would be greatly appreciated. Thanks Kurt
