Thank you for contacting Remington Country. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I have two of your modle 721 rifles and i've read in some magazine about a recall on the trigger, are you still doing this? And i would like to have one of them reblued, if this is possible you did my 270 when i was stationed in rome ny and it still looks like new. Please advise me on the recall and if you can reblue the one gun. Thanks Michael Kuepper las vegas nv.
