Dear Nic:

Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 BDL was produced in or around 1978. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today. Please call your local sheriff's department to inquire about proper licensing and/or registration of a firearm in your locale.

We would suggest that you review the information found on our homepage in the Safety Center entitled "Bolt Action Safety Message: Safety Modification Program for certain pre-1982 rifles".

Hi

I recently was given a rifle from a deceased friends wife. It has Remington 700 on the side, the serial number is a6617803. Which model is this?

This is also the first rifle I have owned, do I need to get a licence for it? I live in NC?

Thanks for your help

Kind regards

Nic
