Dear Marty:

Thank you for your inquiry. This is called the trigger stop screw. This eliminates overtravel of the trigger. We hope that this is helpful to you. If you would like further information, please feel free to contact our custom shop at 1-800-243-9700 M-F 9am-3pm EST, just ask for the custom shop.

I just bought a used Rem 40-x in 6mm rem. There is a small allen screw in the middle of the trigger. Can you please explain what that screw does ?

Thanks

MARTY
