safety

Discussion Thread

Response (Chris) Dear Mr. DiTrapani, 5/24/2004 1:15:05 PM

Thank you for your inquiry. We can remove the bolt-lock at a Remington Authorized Repair Center. You can find your nearest center at the following section of our site.

Customer (David DiTrapani) 5/23/2004 10:33:32 AM Dear sirs i have a model 700BDL .30/06 serial # 6481909 i bought this rifle new back in the very early 1970's. On this model the safety must be taken off to open the bolt and unload the rifle. I muse if have never had a problem with this , however i am going to give this rifle to my younger son , and i would like to know if remington can put on the newer safety which allows the unloading of the rifle with the sdafety on. If so what is the cost if any and where do i send the rifle to have this done. Thanking you in advance , D. DiTrapani
