Thank you for contacting Remington Country. By the serial number, your rifle was produced around 1968. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

[http://www.remington.com/Safety\\_Modification\\_Program/remington\\_safety.htm](http://www.remington.com/Safety_Modification_Program/remington_safety.htm)

Unfortunately a description is not listed with the serial number on models of this age, however the ADL will have a blind magazine which means you can unload from the top only. The BDL will have a hinged floorplate of detachable magazine to unload from the bottom.
