Dear Mr. Harman,

Thank you for contacting Remington Country. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I have a Model 700 ADL in .270 caliber that I purchased new about 1969. Exactly what is wrong with this rifle that warrants a modification? I have never experienced any kind of problem with this rifle at all.

Thanks,

David Harman
