Thank you for your patience. Your Model 700 was produced in 1978. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I have a Remington Model 600. I understand, maybe inaccurately, that there a recall on this model for a trigger or safety problem. Is this true? The serial number of my rifle is A6558053.
