Dear Mr. Schultz, Thank you for visiting Remington Country. From the serial number you provided, it appears your Model 600 was manufactured in or around 1964. Please visit the following link for some important safety information regarding this model.

Greetings

Wonderful find at a gun show this morning, a M600 in 35 Rem. Could I get the build date from you ...ser. # is 5423. Why is the ser. number so short? Any idea how many were made in 35 Rem. And last but not least, what happened to your small reader poll on the home page?

Thanx for now

Brad
