Dear Daniel:

Please refer to the link below on our Remington Model 700 Bolt Lock Safety Modification Program:

[http://www.remington.com/Safety\\_Modification\\_Program/remington\\_safety.asp](http://www.remington.com/Safety_Modification_Program/remington_safety.asp)

This modification effects guns that were manufactured before 1982. We hope that this information is helpful to you.

I'm looking for information about the Model 700 trigger system problems that I've read about. What causes the rifle to fire when the safty is turned off? What can be done to correct the issue? Are there certain years of production that the problem was contained to or is it for all 700s? Any information you can give me would be great. Thanks so much, Dan
