Dear Dennis,

They have changed the website to the below statement, so you are fine.

Remington is extending through December 31, 2006, its Safety Modification Program to remove the bolt-lock mechanism from certain Remington bolt-action centerfire firearms made prior to March, 1982. (Post-1982 bolt-action firearms were not manufactured with bolt-lock mechanisms). To determine whether your firearm has a bolt-lock mechanism and is subject to the safety modification program, click on the model listed below and follow the directions included.

The expiration date on this recall was 12/31/05 not 12/31/06. I just found out about it and hope you will still honor this recall. Thank You.
