#### **Additional Caliber Offerings Now Available in Stainless Version of Remington® Model 700™ SPSTM**

**Madison, NC** – Remington is pleased to announce the addition of five new centerfire offerings to the affordable line of high performance **Model 700 SPS (Special Purpose Synthetic) Stainless** bolt action rifles. New chamberings for 2006 include 204 Ruger, 223 Rem, .22-250 Rem, .308 Win and .300 Rem Ultra Mag.

The Model 700 SPS Stainless rifle features a weather resistant, black synthetic stock with defined grips for improved handling. Completing this sturdy, well-designed stock is the addition of the recoiling-reducing **R30 Recoil Pad** and sling swivel studs. Short action versions feature a clean 24-inch matte finished barrel and the .300 Ultra Magnum version sports a 26-inch barrel. For added durability in the field, the barreled action is constructed of 416 stainless steel and fire control components are plated. The receivers are drilled and tapped for ease of scope attachment.

Built on the highly accurate Model 700 platform, famous for its “three-rings-of-steel” design, these full-featured bolt action rifles deliver in performance at a surprisingly affordable price. The **Model 700 SPS Stainless** is available at a suggested retail price of \$613.

For a complete listing of the SPS family including Youth and detachable magazine versions, please visit our web site at [www.remington.com](http://www.remington.com) or visit your local Remington dealer.
