Subject: RE: XR100 Production for 2005

Thanks John. I got an out-of-office reply when I sent this message, so I forwarded it to John Fink since it said you'd be out until 4/25. John F, please ignore my previous request.

Thanks,

Jim Ronkainen

You can pretty well count on between 3k and 5k units on the XR-100. Depending on what you can come up with, it could potentially find its way into our entire varmint line.

Thanks,

JT

Subject: XR100 Production for 2005

John,

I'm trying to get an idea of the annual product volume we're looking at with the SPL 40X variant for the 40X trigger assembly. Knowing this will help me make some decisions about design approach that will have the minimum cost implications for the new design. With the recent change to the generic SAP account, the production schedule report (ZPRDSCHL) won't run for me so that I can see what the volumes are. Can you tell me what we expect to build/sell for SKUs 25839, 25841 and 25843?

Thanks!
