Ditto Grant. Nail struck squarely upon its head.

Gentlemen,

Consider your rifle maintenance a liability issue mandate. Maintenance does not mean just cleaning the bore.

Charlie gives a terrific presentation on the Remington trigger. It is a Damn good system. But it DOES require maintenance such as cleaning & lubrication. When it gets gunked up, like other brands of rifles, it can be problematic.

It took a few years to get my dept. bosses to acknowledge the need for nifle service by a REPUTABLE nifle armorer. Sure is nice to have complete confidence in your TOOL and comfort in knowing that someone will be there to support you because you HAD IT SERVICED BY A PRO!!!

Get your rifles serviced by a pro.

Deputy Doug Bourdo Kenosha Sheriff Sniper Team Leader
