

**FIREARM UPDATES 07/28/04 TRULL & FINK**

**700 TPA SPECS**

Engagement was set and a weight placed on a fixture **OUTSIDE THE GUN**. Two years ago the trigger pull was set at 4 ½ - 6 ½ lbs. @ trigger assembly area in Ilion. Once inside the gun, the trigger pull goes to 7-8 lbs.

**NOW** (in effect fall 2004) trigger pull will be re-checked at final assembly at approx 4 ¾ - 5 ¾ lbs.

**◆ISS SYSTEM REMOVAL ◆ FALL 2004 ◆DO NOT ANNOUNCE ◆**

It would be too costly to bring all guns currently manufactured into CA DOJ compliance.

MAY guns will be shipped with cable lock. All other guns with common fire control (870, 11-87, 7400, 7600) will be shipped with a clamshell key lock. All clamshell locks are keyed alike, this is not a CA DOJ requirement.

Bolts will be replaced with non-ISS firing pin assembly when supply runs out. If consumer is concerned, send a lock.

Non-ISS firing pin assemblies can be sent – these are not restricted.

**Non-ISS firing pin assemblies have a new fluted design that will give uniform the support needed to straighten out the main spring.**

**597 MAGAZINE BOX DESIGN CHANGE EFFECTIVE 09/2004**

Completely new mag box design. Box bottom is 1/8" longer than current model. Eliminates shifting in mag box. Should now be able to load 10 rounds in the box.

- **WILL HAVE A BREAK-IN PERIOD OF APPROX 5-10 LOADINGS.**
- **THERE WILL BE A DIFFERENTIAL BETWEEN THE OLD AND NEW DESIGN MAGAZINES.**
- **THESE WILL BE HANDLED ON A CASE BY CASE BASIS, NOT A RECALL.**
- **ALL COMPONENTS OF THE BOX ARE DIFFERENT.**
- **THEY ARE WORKING ON CHANGING THE MAGNUM MAGAZINE BOX NOW.**
