The Remington® Slugger® Goes High-Velocity

Madison, NC – New for 2003, the Remington Slugger rifled shotgun slug is now offered in a High-Velocity 7/8 ounce version boasting a 1800 fps muzzle velocity. The **Remington Slugger High-Velocity** offers smooth bore shooters a lead slug exhibiting flatter trajectory and increased down range energy for hard-hitting deer dropping performance.

The Remington Slugger rifled shotgun slug has been the standard for smooth bore hunters for decades. Its legendary capability of harvesting big game at close to medium ranges without the aid of a rifled barrel has made the Remington Slugger a common name around hunting camp. The slightly oversized diameter of the lead slug creates a perfect seal against the shotgun barrel wall, resulting in more consistent shot-to-shot accuracy and velocity.

Remington offers a complete array of shotgun slugs that are guaranteed to meet the needs of each and every shotgun hunter. In addition to the Remington Slugger High Velocity, Remington offers the following:

- **Premier® Core-Lokt® Ultra** – The ultimate in jacketed, bonded sabot slugs for the most demanding applications.
- **Premier® Copper Solid™** – An all-copper high performance sabot slug.
- **Express® Buckhammer™** – A more traditional lead slug designed to perform extremely well in fully rifled barrels.
- **Slugger®** – A traditional "Foster" style lead slug preferred by smoothbore shooters.

Offerings for 2003:

- **Slugger® High Velocity Rifled Shotgun Slugs**

	Gauge	Shell Length	Wt. Slug	Muzzle Velocity
New	12 ga.	2 3/4"	7/8 oz.	1800 fps Muzzle Velocity
