To: All Remington Arms Repair Centers From: Remington Arms – Field Service

Date: 25 February 2002

Please review the attached instructions with your gunsmiths. Remington is going to release via sporting magazines an offer to clean, inspect, and remove the bolt-lock from certain bolt-action rifles that were equipped with the bolt-lock feature that were manufactured prior to 1982. This will be voluntary for the customer. The packet explains our offer. We wanted you to be aware of this prior to it being released to the general public. One of our field service representatives will be contacting you to discuss the enclosed documents and our offer.

If you have questions or are contacted by customers with questions about this offer please refer to our web site www.remington.com for additional information.
