RE: M/700 TRIGGER REPLACEMENT CAMPAIGN FOR BOLTLOCK
REMOVAL

Remington produced M/700 rifles from 1962 to Feb. 26, 1982 with a boltlock feature. Customers who would like a bolt lock added to post 1982 guns can have a new trigger or safety lever installed for a fee. Approximately 1.84mm guns were produced with bolt locks..

A campaign to replace trigger assemblies at our New Gun Repair Stations or in-house would cost approximately \$9.8mm based on a return rate of 20%.
