Sirs:

- returning my 14 yr. old son's Rem. Model
to your inspection + repair. Recently while
ing in the gun for deer season, the gun discharged
out pulling the trigger when the Bolt was close
ew shots Later the gun fired when the safety was
oved to the fire position. Luckily no one was injured.
I am very concerned about the safety of this gun.
I hope that you will inspect + repair +
respond to its safety. Please return as
soon as possible as my son had planned
to use it deer season.

Thank you
Larry Akers
