Dear Sir:

Twice in the 6 years I have used this rifle
it fired when I released the safty.

This last time it done \$600 damage, as i had
got into the p-ckup due to rain.

I understand this has been a problem with the
Modle 700. What can be done to correct this? I have
talked to the local gunsmith, he has had other inquires,
But does not know what to do to correct this defect.

Yours truly,
