Dear Vic:

I am returning 1 model 700 EDL Remington rifle serial No. 6499295 for repair. This rifle in two cases has gone-off when the safety was pushed to the fire position. Each instance occurred with different people and both of them say they did not have their finger on the trigger. One man blew a big hole in the floor of his pickup truck.

Please fix this and send us a bill as soon as possible.

Thanks
